Dionmax Figueiredo Nobre

Santa Catarina - Brazil | +55 47 997342025
dionmaxfn@gmail.com | https://www.linkedin.com/in/dionmax/

Graduated with a bachelor's degree in computer science and worked remotely in software development at GeoSapiens Tecnologia e Informação for three years. I consider myself a person who likes to learn new ways to improve something, with a great interest in the area of algorithm complexity and code optimization.

I have always found it easy to work in groups and learn new work methods and technology. At the company where I worked, I participated in some projects involving data control and monitoring for private companies, using agile methodology and continuous development workflow with the help of Github versioning and code control tools.

I have experience with web software development using Node.js with Typescript language in the NestJS and React frameworks in one of the projects I work on and experience in PHP with the Symfony framework. In addition to the vast knowledge in querying and manipulating databases using SQL and R. with Postgresql.

I also developed several works in Python, Java, and C++ in academia involving various subjects, from AI to inventory control. I also developed projects in C#, Python, and Jupyter Notebook due to my interest in learning about language technologies and Data Science.

My goal is to continue working in the job market and acquire as much knowledge as possible in technologies used in large companies to be able to work outside the Brazilian market, in another country. I am always looking to improve my skills in software development and grow more and more, in addition to working on different projects to improve my knowledge.

CHARACTERISTICS

* Passion for software development;
* Passion for working on development research and scientific knowledge;
* Communicative, enjoy working in teams.

SPECIALTIES

* Experience in using agile methodologies;
* Good communication, presentation, and teamwork skills;
* Ease of learning new concepts and technologies;
* Advanced English, I can communicate and discuss;

SKILLS

* PHP
* C#
* SQL
* C++
* React
* Javascript
* Typescript
* Postgres
* Python

EXPERIENCE

Full Stack Software Developer III   Nov 2019 - Apr 2023
PHP - Symfony - Postgre - SQL - React, Itajaí
I worked on the development of two PHP web projects with Symfony2, a project with
Typescript and React, and functions involving database queries with R and SQL for
analysis and generation of information. Constant improvements in existing projects
and the development of new ones.

EDUCATION

Bachelor's Degree - Computer Science   Sep 2017 - Jun 2022
Univali, Itajaí - SC

Technical Course - C# Complete Object Oriented Programming   Aug 2019
Udemy

Technical Course - Python Fundamentals for Data Analysis and Data Science   Feb 2024
Data Science Academy
